EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Luke K. Pedersen (the Undersigned Attorney, Reg. No.45,003) on 1/18/2008.

The application has been amended as follows:

IN THE CLAIMS:

Please amend claim 44 as follows:

--44. (Currently Amended) Computer software, stored on a computer-readable storage medium, comprising instructions for causing a computer processor to perform the following operations: receive real-time audio data from a source audio client; attenuate the received real-time audio data and stored audio data associated with a point source based on audio decay characteristics to simulate positions of the source audio client, the point source, and a target audio client, wherein each source audio client and each point source is assigned a respective selected decay function from a plurality of predefined decay functions; and deliver the attenuated audio data to the target audio client; wherein attenuating comprises: calculating a weighted value for each source audio client and each point source based upon the particular decay functions respectively associated with each source audio client and each point source;

Application/Control Number: 09/487,593

Art Unit: 2151

wherein each weighted value corresponds to a particular percentage of a maximum volume at which the attenuated audio data may be delivered to the target audio client, and wherein delivering the attenuated audio data to the target audio client comprises delivering the portion of the attenuated audio data respectively associated with a particular source audio client or a particular point source only if the weighted value respectively associated the particular source audio client or particular point source exceeds a predetermined value.--

Terminal Disclaimer

2. The terminal disclaimer filed on 1/18/2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the US Application 08/841,397 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

3. Claims 26-30, 32-47 and 49 are allowed.

Reason for allowance

4. This communication warrants no examiner's reason for allowance, as applicant's reply makes evident the reason for allowance, satisfying the record as whole as required by rule 37 CFR 1.104(e). In this case, the substance of applicant's remarks filed on 12/18/2007 with respect to the added claim limitation point out the reason claims are patentable over the prior art of record. Thus, the reason for allowance is in all probability evident from the record and no statement for examiner's reason for allowance is necessary (see MPEP 13202.14).

Application/Control Number: 09/487,593

Art Unit: 2151

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Khanh Dinh whose telephone number is (571) 272-3936. The examiner can

normally be reached on Monday through Friday from 8:00 A.m. to 5:00 P.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, FOLLANSBEE JOHN, can be reached on (571) 272-3964. The fax phone number

for this group is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
